

JOSEF SHOHEIT

Newton, MA • (617) 610-1795 • joe.shohet@gmail.com • jshohet.dev • linkedin.com/in/josef-shohet

Operations manager who builds the tools he wishes he had. I've run a \$50K/week Starbucks location, been tapped to take full store ownership during a leadership gap, and spent the time in between building scheduling and forecasting software based on what I learned on the floor.

EXPERIENCE

Assistant Store Manager / Acting Store Manager

Sep 2024 – Present

Starbucks Coffee Company — Newton, MA

Selected to serve as Acting Store Manager during a leadership gap — full accountability for operations, staffing, and performance at a \$50K+ weekly revenue location for one month.

- Redesigned labor scheduling around actual demand patterns, cutting labor cost by 20%
- Rebuilt peak-hour bar flow and handoff sequencing to reduce bottlenecks and improve throughput
- Reduced order errors by standardizing training across all shifts
- Manage and develop a team of 25+ employees across multiple roles and schedules

Freelance Software Developer

Sep 2022 – Present

Self-Employed

Build full-stack operations tools — the kind that solve problems I've run into managing a retail location.

- Built StoreOps, a scheduling and forecasting platform that models real demand patterns to reduce labor waste
- Developed KPI dashboards tracking labor trends, performance metrics, and shift-level efficiency
- Created automation tools that cut repetitive manual workload and improve execution consistency
- Stack: React, Node.js, PostgreSQL, MongoDB, AWS

Irrigation Manager / Assistant Superintendent

Mar 2019 – Feb 2022

The Country Club — Brookline, MA

Managed infrastructure operations at one of the most recognized private clubs in the country.

- Oversaw 3,000+ component irrigation system across a championship course
 - Reduced water usage by 37% through monitoring, analysis, and targeted system changes
 - Led teams of 10+ staff across daily operations and maintenance
 - Planned and executed field operations for the 2022 U.S. Open
-

PROJECTS

StoreOps — jshohet.dev

Full-stack workforce planning platform built in React, Node.js, PostgreSQL, and AWS. Models real scheduling constraints and demand data to reduce labor inefficiency.

EDUCATION

B.A. Economics — University of Massachusetts Amherst
